SPIE Author Information

PROCEEDINGS GUIDELINES

Presentation and Publication Policy
SPIE's conferences provide an opportunity for presentation of reports on current research resulting in proceedings that accurately reflect those presentations. Authors are expected to submit manuscripts containing original, previously unpublished work, in accordance with their specific conference deadlines.

All authors of oral or poster papers must furnish manuscripts

8 to 12 pages long, single-spaced
Written in English
Received by the published due date
Not acceptable: short summaries, viewgraphs, and abstracts Late manuscripts may not be published. Much of the value of the Proceedings volume depends on timely publication and distribution. To ensure inclusion in the Proceedings, manuscripts should be received by the announced due date.

Authors are expected to attend the meeting and present their papers. Papers not presented at the meeting will not be published in the Proceedings, except in the case of exceptional circumstances at the discretion of SPIE and the Conference Chair/Editor. If unforeseeable circumstances prevent you from attending the meeting and keeping your commitment, please notify your staff Proceedings Editor immediately, and arrange for a coauthor or colleague to make the presentation.

Company or government clearance must be final at the time of submittal. DOD contractors need to allow a minimum of 60 days for government clearance.
Authors are required to warrant to SPIE in advance of publication of the Proceedings that all necessary permissions and clearances have been obtained, and that submitting authors are authorized to transfer copyright of the paper to SPIE for publication in the Proceedings.

The Society views as unprofessional the arbitrary withdrawal of a paper once the author has made a commitment to prepare it, the paper has been accepted by the conference committee, and the presentation has been announced in the Advance Technical Program. The withdrawal of a paper after the Advance Technical Program is distributed jeopardizes not only the Society's credibility, but the author's professional reputation as well.
